

Teacher Management System Documentation

1. Introduction

The Teacher Management System is designed to simplify academic activities performed by teachers within schools and colleges. This module helps teachers manage students, attendance, assignments, marks, and communication in an organized and efficient way.

2. Objective

The main objective of the Teacher Module is to manage student records efficiently, simplify attendance management, upload assignments, track academic performance, and improve communication between teachers and students.

3. Teacher Dashboard

The Teacher Dashboard acts as the main control panel for teachers. It includes attendance summaries, assignment notifications, student performance details, and schedules.

4. Teacher Profile Module

This module stores teacher information such as teacher name, subject, qualification, experience, and contact details. Teachers can update profiles and change passwords.

5. Student Management Module

The Student Management Module helps teachers add, edit, delete, search, and monitor student information and performance.

6. Attendance Management Module

Teachers can mark attendance, generate reports, view absent students, and calculate attendance percentages using this module.

7. Assignment Management Module

Teachers can upload assignments, set deadlines, review student submissions, and provide assignment feedback.

8. Marks and Report Module

This module helps teachers enter internal marks, calculate grades, generate reports, and analyze student performance.

9. Communication Module

The Communication Module allows teachers to send notifications, announcements, and classroom updates to students and parents.

10. Advantages

The Teacher Module saves time, improves academic management, reduces paperwork, and supports secure digital record maintenance.

11. Future Enhancements

Future improvements include AI-based analytics, mobile application support, live class integration, and smart attendance systems.

12. Conclusion

The Teacher Management System improves teacher productivity and creates a modern educational environment for effective teaching and learning.

13. Sample Database Tables

Field Name	Type
teacher_id	Integer
teacher_name	Varchar
subject	Varchar
qualification	Varchar
experience	Integer

Field Name	Type
student_id	Integer
student_name	Varchar
department	Varchar
attendance	Integer
